

TOWEL WARMER INSTALLATION

BEFORE YOU BEGIN

We recommend consulting a professional if you are unfamiliar with installing bathroom fixtures. Signature Hardware accepts no liability for any damaged caused, or for personal injury, during installation. Hardwired towel warmers should be installed by a licensed electrician.

Observe all local plumbing and building codes.

Unpack and inspect the product for shipping damage. If any damage is found, contact our Customer Relations team at 1-866-855-2284.

This electric towel warmer is intended for drying towels in an indoor residential environment. Other forms of use or changes to the product are deemed to be contrary to the intended use and may result in risks such as the danger of death, injury and damage. Signature Hardware does not accept any liability for injury or damage resulting from use of this product contrary to its intended use. This product is not intended to be used for commercial purposes.

GETTING STARTED

- Ensure that you have gathered all the required materials that are needed for the installation.
- Before performing any electrical work, ensure that the main power source is shut off to avoid electric shock.
- Prior to installing the towel warmer, a single-gang switch box should be installed in the wall. The electrical plate will cover this switch box.

TOOLS AND MATERIALS:

Hex Wrench
(provided)

Phillips
Screwdriver

Flathead
Screwdriver

Tape Measure

Drill

Level

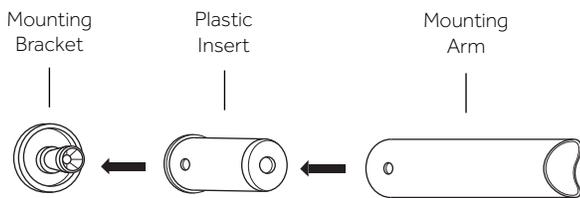

Pencil

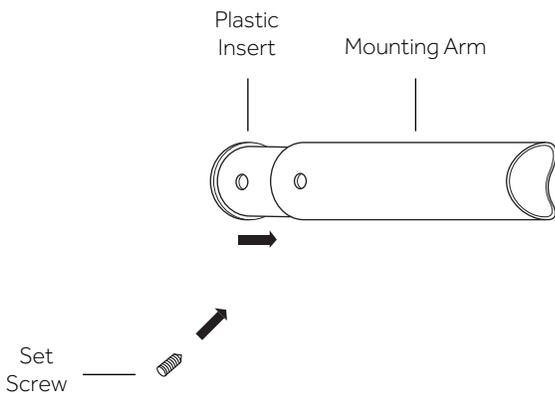

TOWEL WARMER INSTALLATION

INSTALLATION

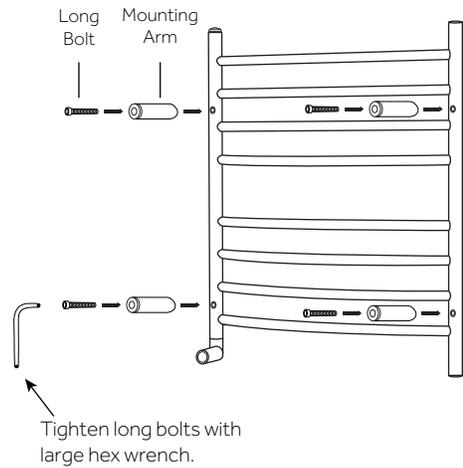

1. Remove the mounting bracket and plastic insert from each of the mounting arms. Set the mounting bracket aside.

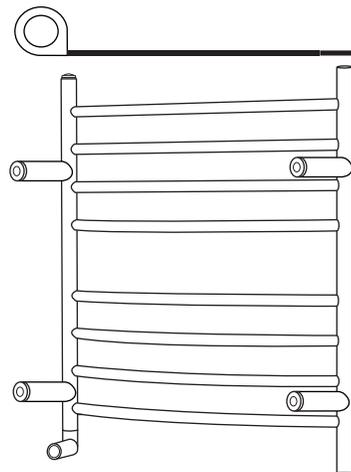

2. On each arm, reinsert the plastic insert, ensuring that the holes on the insert and mounting arm line up perfectly. Thread one of the provided set screws into the hole on each mounting arm, just enough to hold the plastic sleeve in place.

3. Attach each of the mounting arms to the back of the towel warmer. Use the provided long bolts and large hex wrench to secure. Ensure that the set screws are facing down, towards the end of the towel warmer containing the wiring.

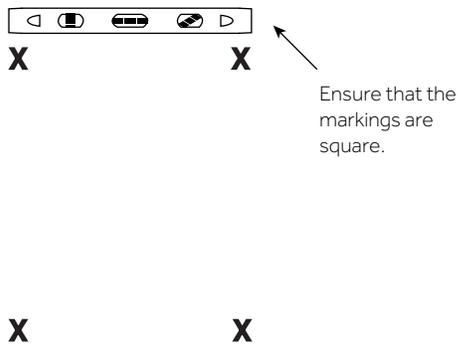

4. Use a tape measure to measure the distances between each of the four mounting arms.

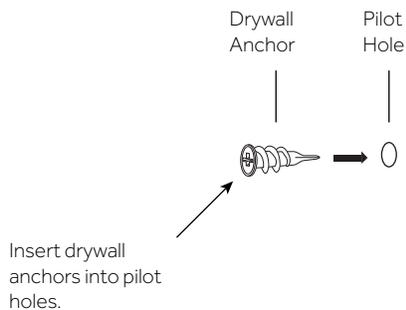

TOWEL WARMER INSTALLATION

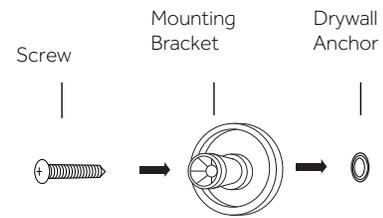

5. Determine a location to mount the towel warmer on the wall. Use the measurements taken in the previous step to mark the exact location of each of the four mounting holes on the wall. Use a level to ensure that the mounting holes are marked square.

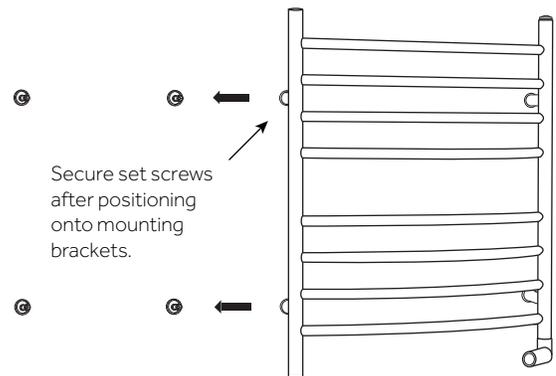

6. Drill pilot holes into the wall at each of the four marked mounting hole locations. Insert one of the provided drywall anchors into each hole.

7. Attach each of the four mounting brackets to the wall, using the provided screws. Tighten firmly into the installed drywall anchors.

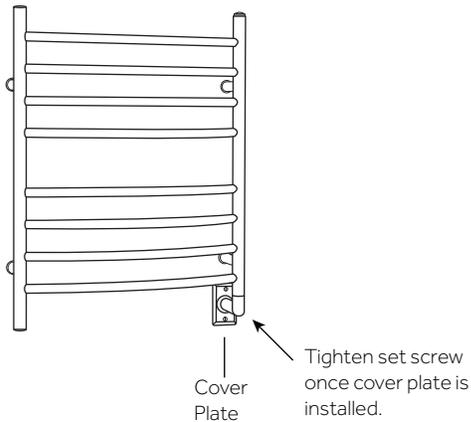

8. Hang the towel warmer onto the installed mounting brackets. Secure the towel warmer to the wall by tightening each of the set screws on the bottom of each mounting arm, using the provided hex wrench.

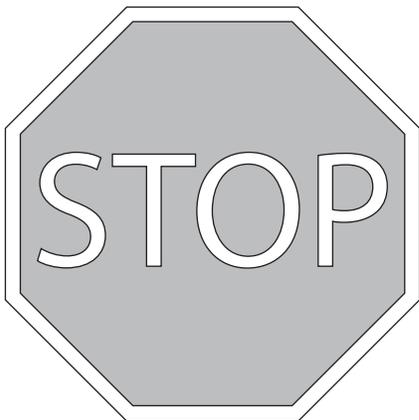

TOWEL WARMER INSTALLATION

9. Slide the decorative electrical cover plate onto the towel warmer. Loosen the set screw located on the arm covering the towel warmer's wiring, and turn the arm towards the wall. Tighten the set screw.

10. A professional is required to complete the wiring for the towel warmer. Consult a licensed electrician to finish the installation. Once the wiring is complete, attach the cover plate to the wall using the provided screws.

NOTICE: WHEN NOT IN USE, ENSURE THAT THE TOWEL WARMER'S POWER SWITCH IS IN THE OFF POSITION. THIS WILL PREVENT DAMAGE TO LINENS HUNG FOR A LONG PERIOD OF TIME, AS WELL AS THE POSSIBILITY OF INJURY.
